DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

UNIVERSITY OF BARISAL

1st In-Course EXAMINATION

Course Title: Simulation and Modeling

Course Code: CSE-3209

3rd Year 2nd Semester

Session: 2017-18

Time: 1 hour **Marks:** 10

Answer all the Questions from the followings.

1. What do you understand by "Time Advance Mechanism" in simulation? Explain with its principles. [2]

2. Write short notes on the followings: [3]

   i. Continuous Distribution ii) Uniform Distribution iii) Exponential Distribution

3. A computer repair person is "beeped" each time there is a call for service. The number of beeps per hour follows Poisson distribution with mean of 2 per hour. [2]

   i) What is the probability that there will be 3 beeps in coming hours?

   ii) What is the probability that there will be 2 or more beeps in 1 hour period?

4. Describe Empirical Process? When it is used and what are its advantage and disadvantage? [3]
